

PLYWOOD Decorative

CONSTRUCTION

A composite panel formed by the cross bonding of layers of timber veneer using Interior Grade Urea Formaldehyde Adhesive (UF). Compliant with International Hardwood Plywood Association (IHPA) specification.

APPLICATIONS

Decorative ply is ideal for all applications requiring flat surface wood finishes. It is utilized in the manufacture of furniture components including paneling, cupboard doors, tables, desking, bed bases, coffee tables, dressing tables, sideboards, wardrobes, wall dividers, credenzas, display units etc.
